

Laser/Optical Engineer

Education

- B. Sc. minimum,
M. Sc. or Ph. D. Preferred
- Discipline:
 - Physics
 - Optics
 - Electrical Engineering

Skills

- Good practical experience with lasers
- Good understanding of laser theory
- Good understanding of optical beam propagation is essential
- Familiar with optical and electro-optical materials
- Familiar with optical laboratory instrumentation
- Familiar with optical design, including optical design software
- Desire to work in the laboratory
